

How to Launch the New Design

New Design for Music Player

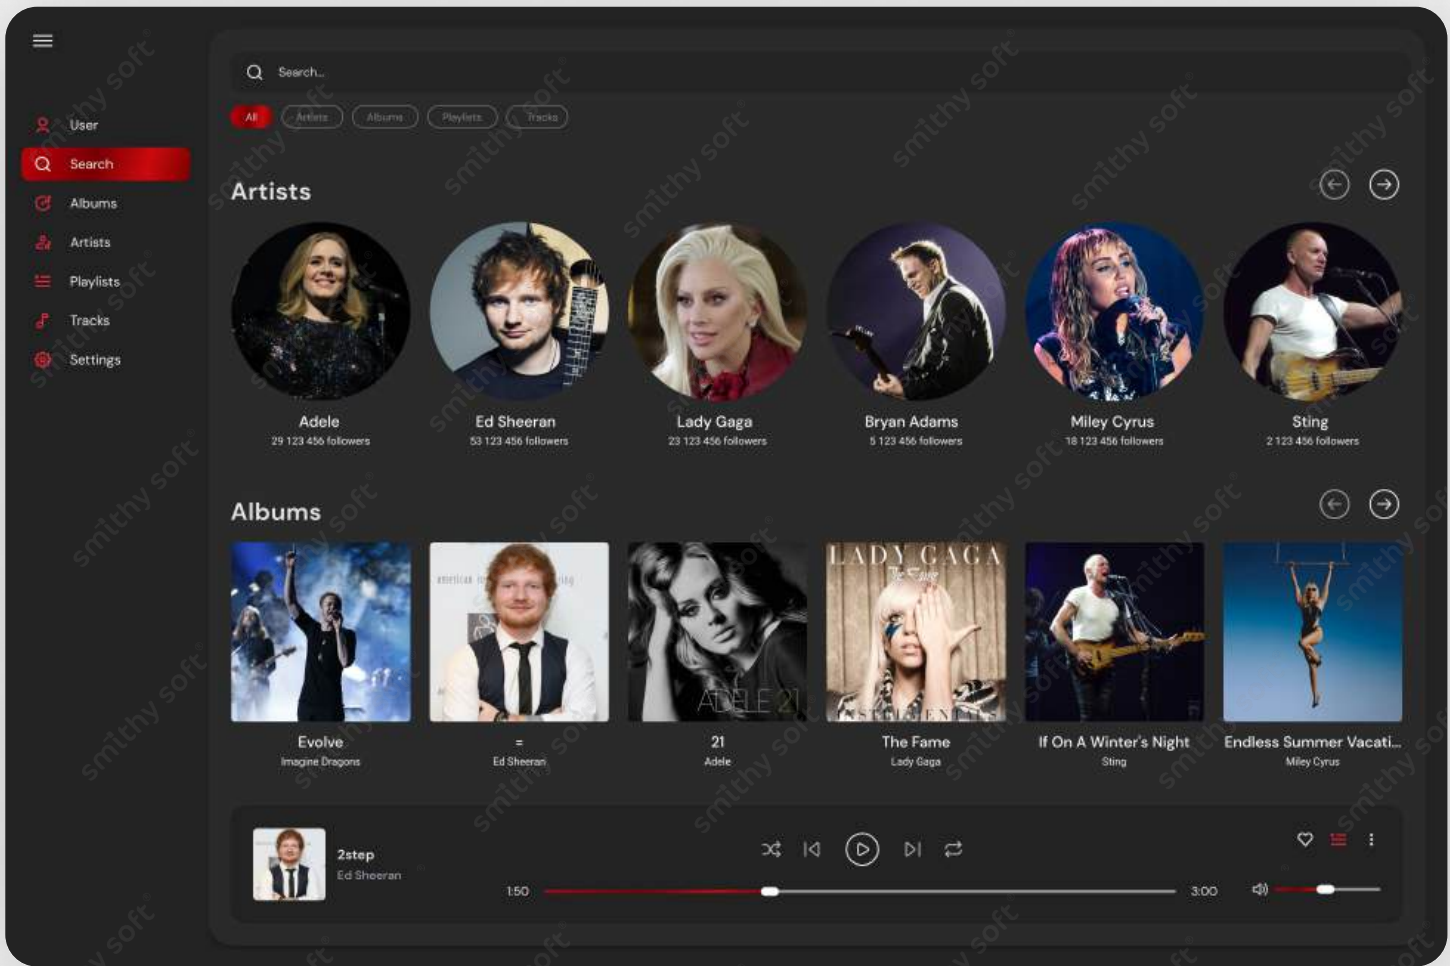

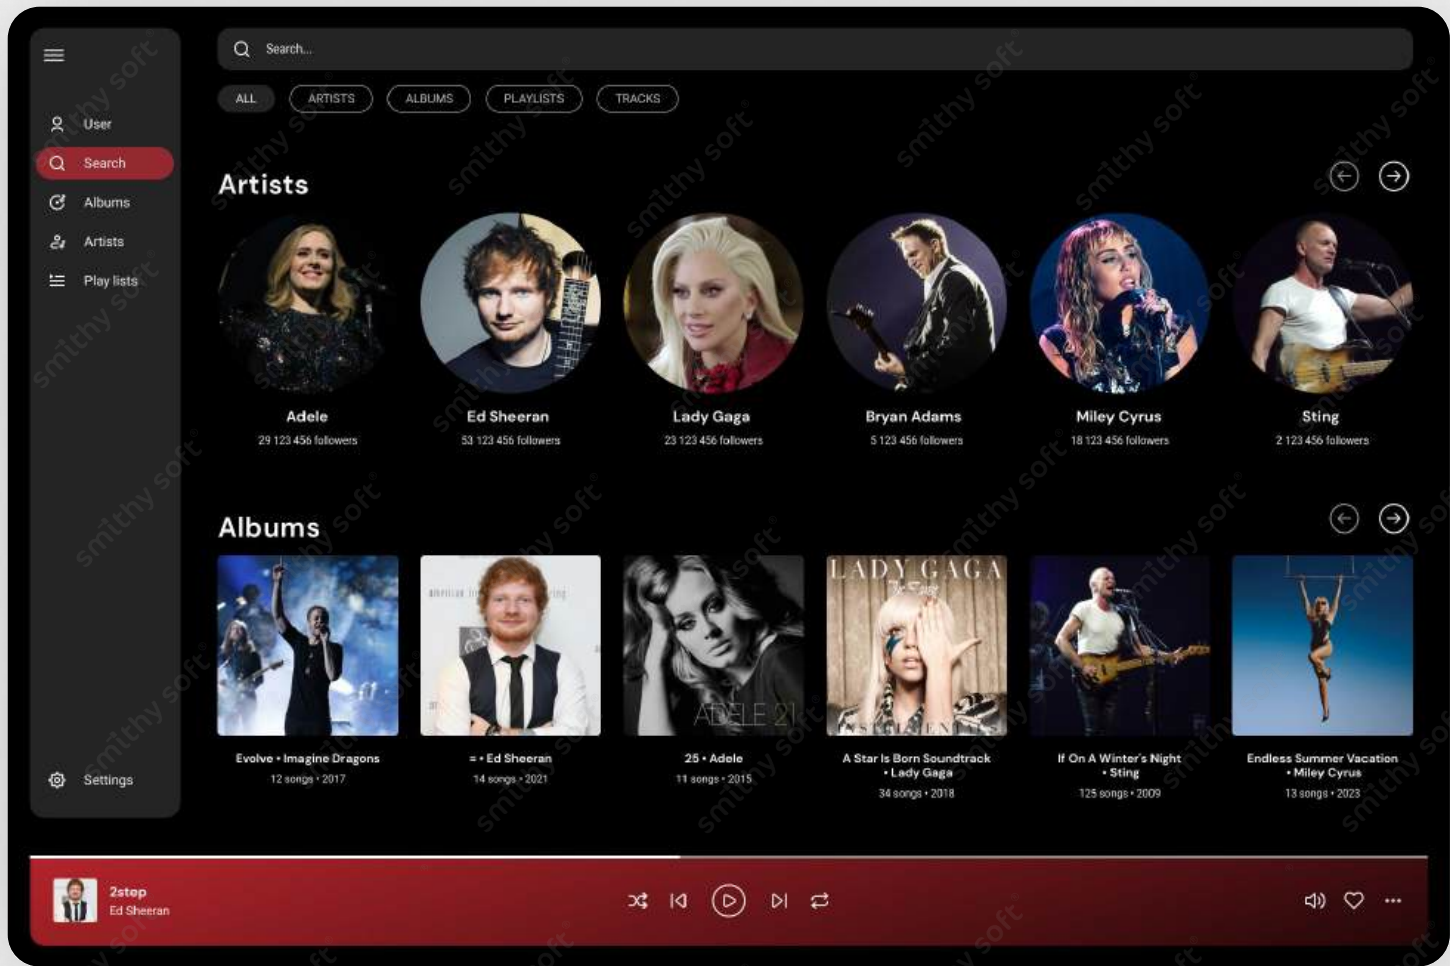

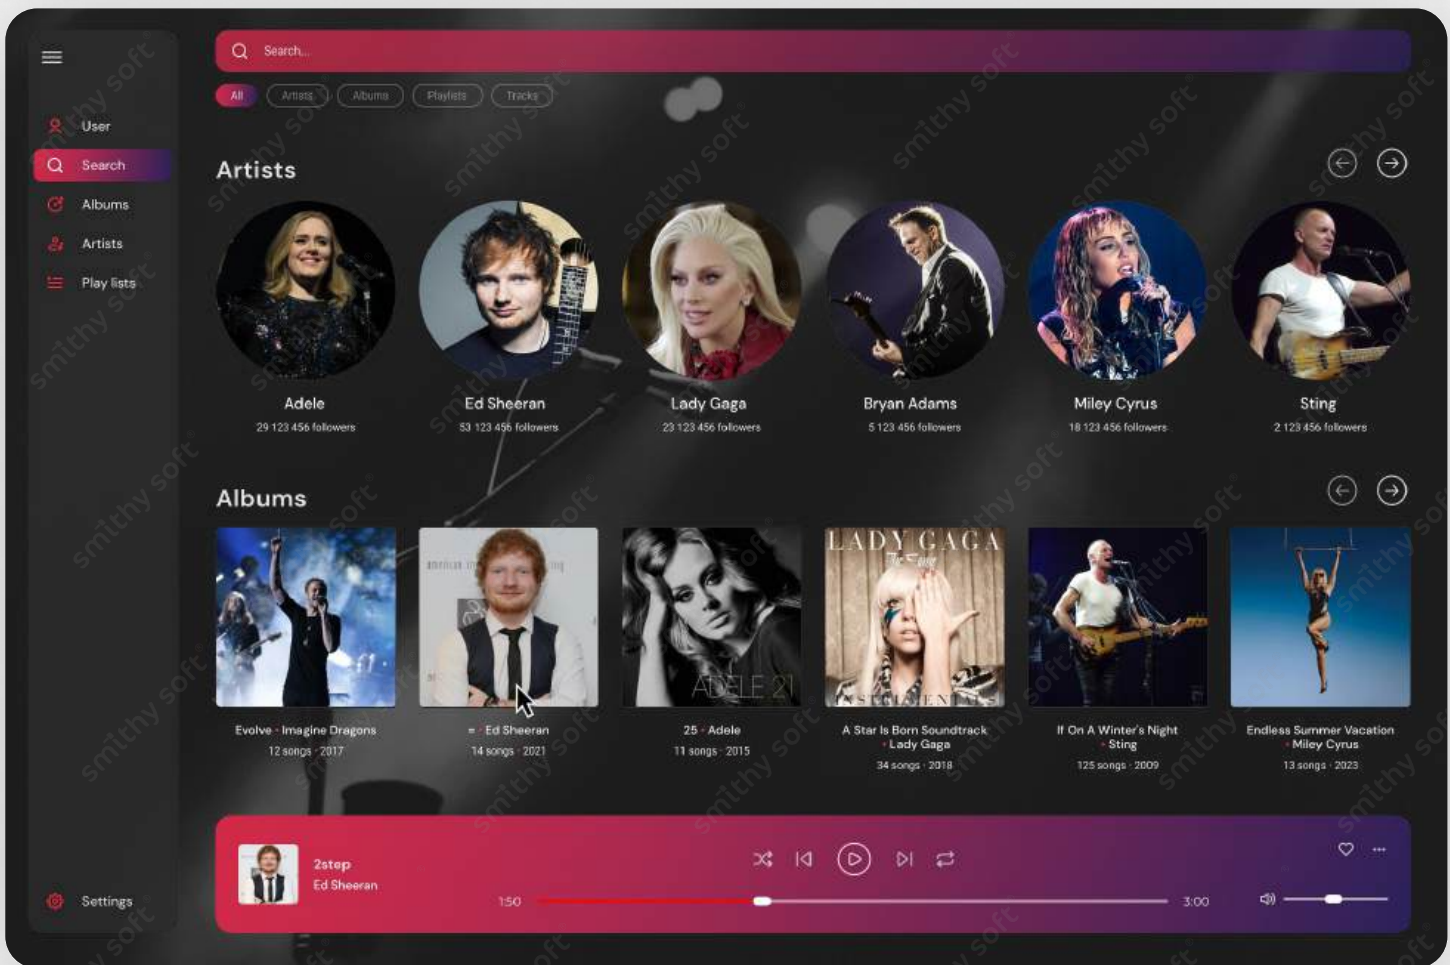

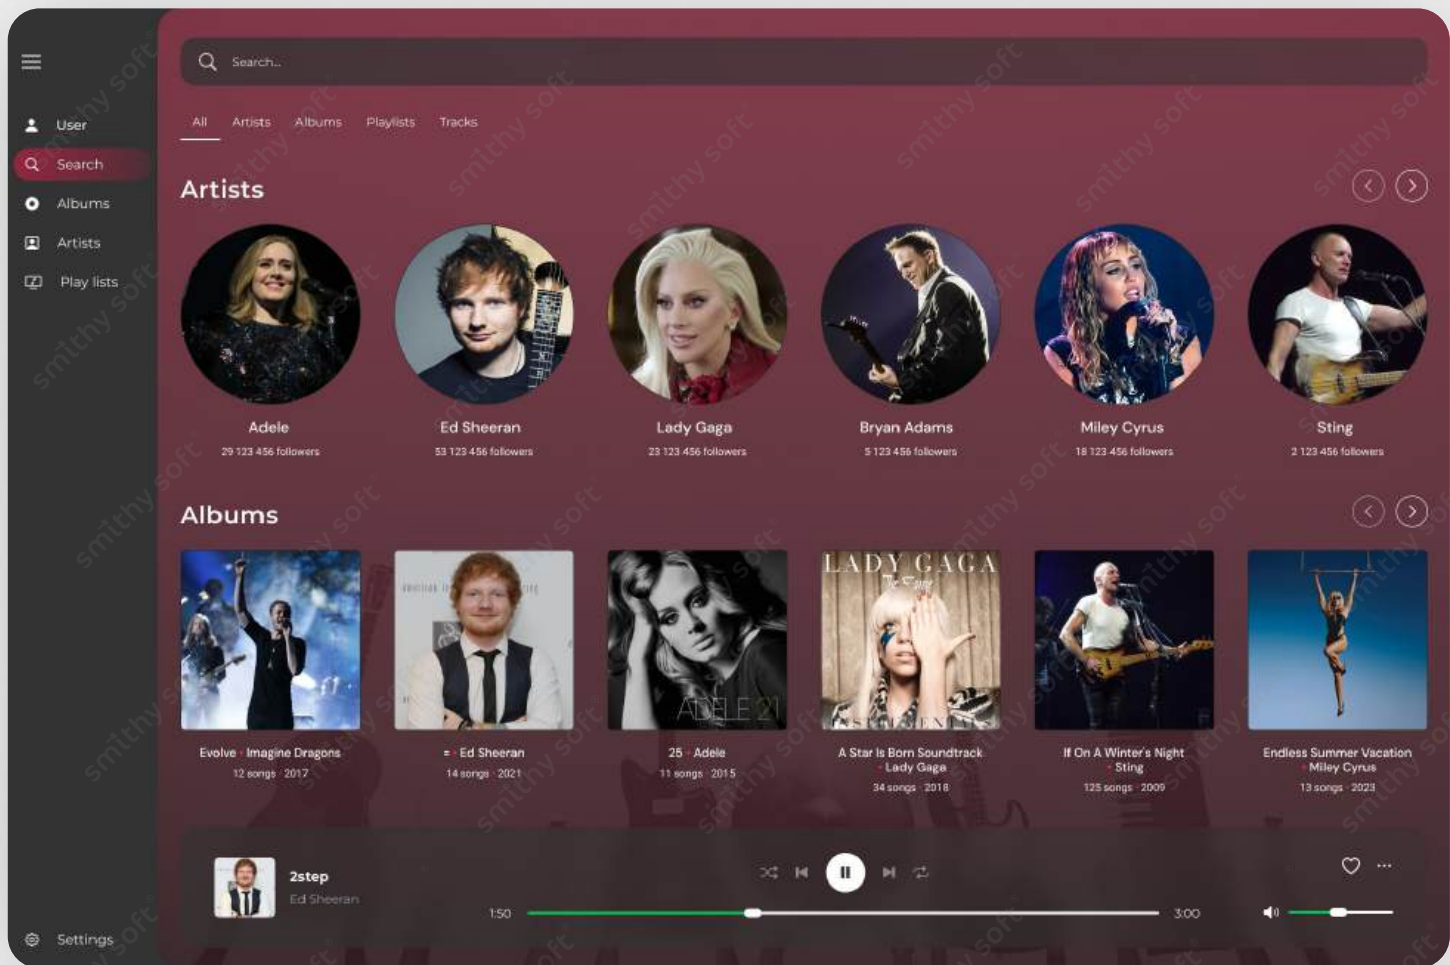

Development of Wireframes

A wireframe is a visual representation, typically two-dimensional, depicting the layout of a webpage or application interface. Wireframes exclude styling, color, and graphics.

Development of the Design Concept

Selecting and presenting several design options to choose from.

Selection of Color Palette

The design of the Music Player has 2 color palette — light and dark.

Main gradient

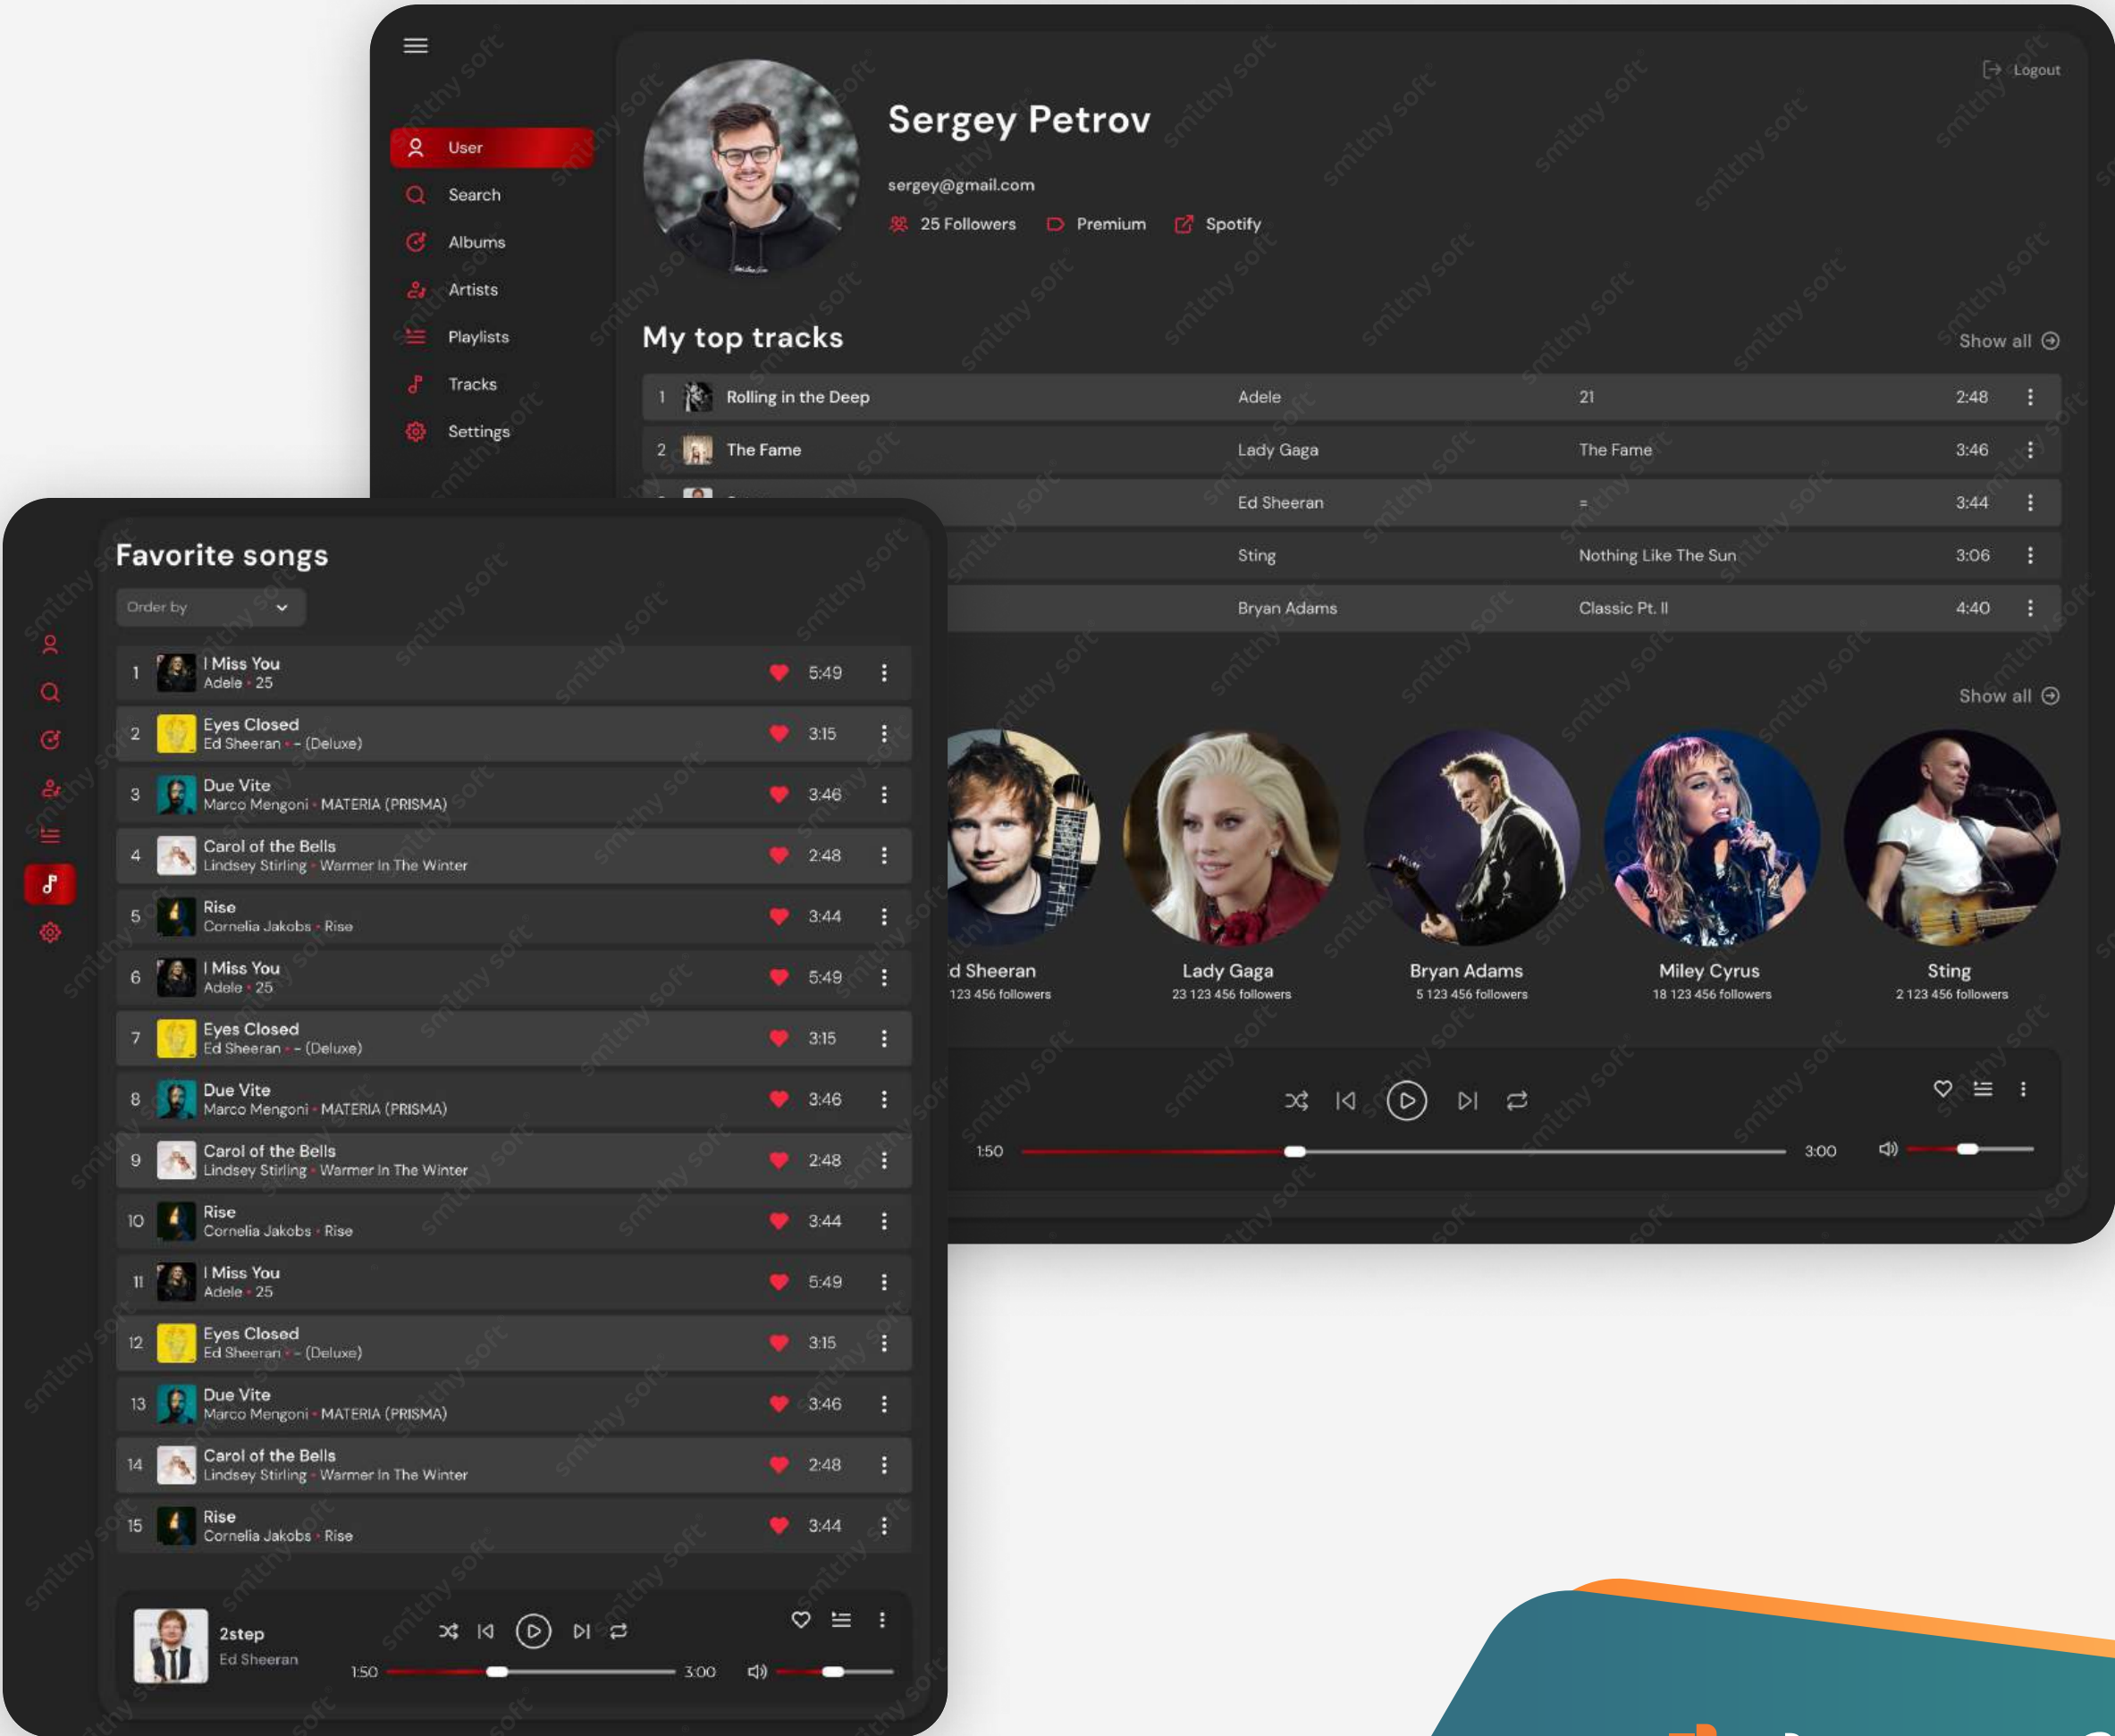

#BB020B #780004
#CBOBOE #810000

Background color
#222222

Text color
#FFFFFF

Additional color
#2C2C2C

Additional color
#E4E4E4

Selection of Color Palette

The design of the Music Player has 2 color palette — light and dark.

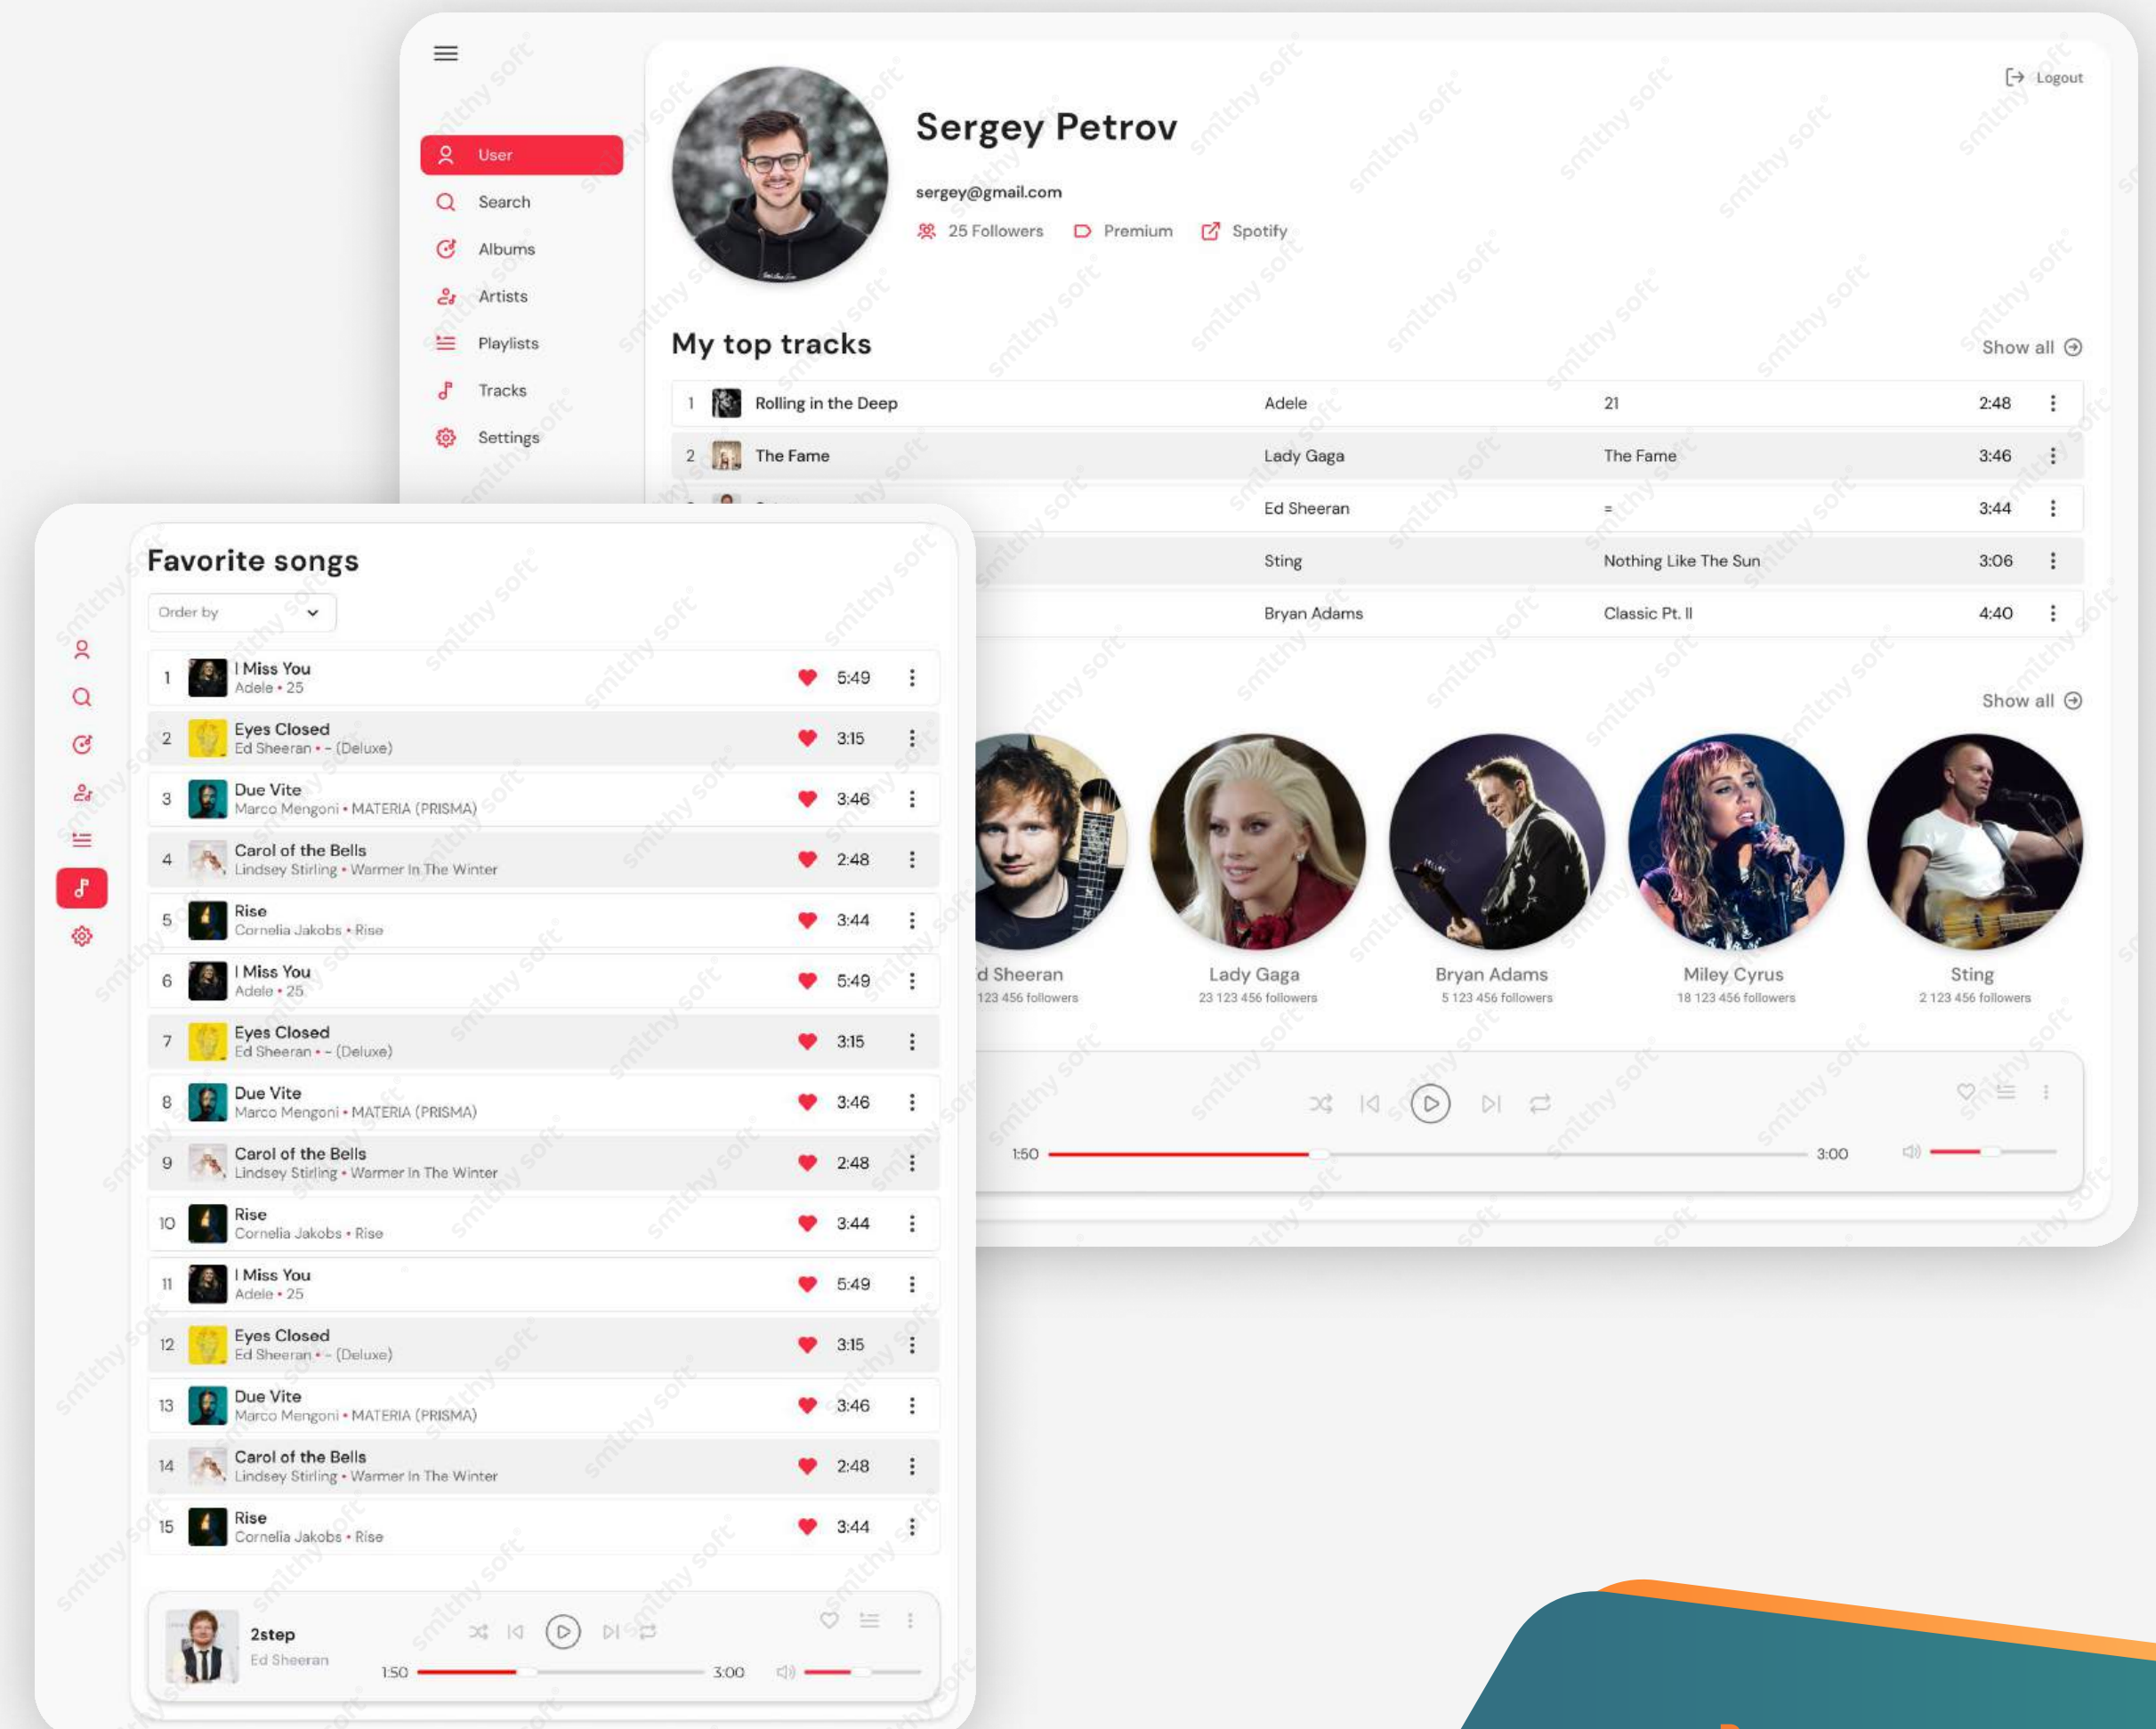

Main color
#F82A41

Background color
#F9F9F9

Text color
#1E1E1E

Additional color
#707070

Additional color
#D8D8D8

DM Sans

Regular Medium Bold

DM Sans was designed by Colophon Foundry (UK), that started from the Latin portion of ITF Poppins, by Jonny Pinhorn.

Development of Components

A UI Kit includes ready-made parts and designs to help you create a good-looking and consistent user interface for your app or website.
